Vibratory Feed Systems

**Precision hand crafted  
Vibratory Feed systems.**

Ω

Founded in 2003, AKS Enterprises has been providing high performance quality feeder bowls for today's demanding production rates. Our background includes a long list of return customers which help enforce our mission statement:

**We strive to provide efficient techniques and products to help meet our customers' needs. Moving production parts proficiently in order to reduce our customer's overhead is a trademark of AKS Enterprises that coincides with our passion to satisfy our customers' needs.**

Our sales and engineering staff will work tirelessly to provide you with your quote within 24-hours upon receiving the production rates, parts, or parts print.

The need for you as a product provider to hit your delivery dates is always a top priority at AKS Enterprises' normal delivery time is four to six weeks.

We understand our reputation is entwined with quality product and on-time deliveries. Meeting these milestones has helped set us apart from our competition while supporting our Motto:

**Building Loyalty through quality work and quick service.**

With Iron Horse as our distributor and engineering consultants, we have improved our design and sales response time considerably. In addition to vibratory feeders, we offer complete product delivery systems as well as automation and custom design, no matter what the application. AKS Enterprises can meet any of your feed system needs; from an individual component to the entire production line.

The following product pictures exemplify our myriad capabilities.

# Vibratory Feeders

Rounds for the Air-Marshals are being feud into the final assemble machine.

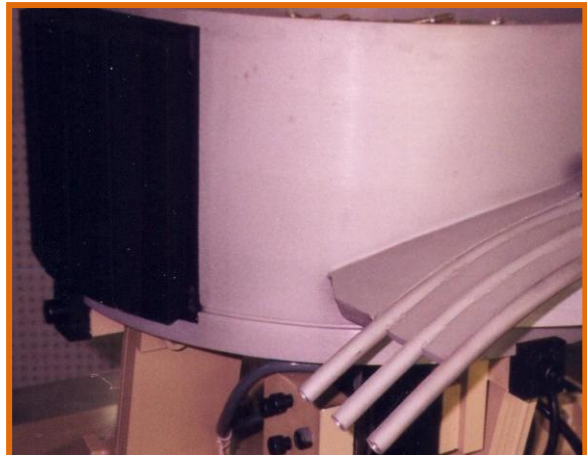

Multi-laning out of the bowl will provide a smaller loading platform.

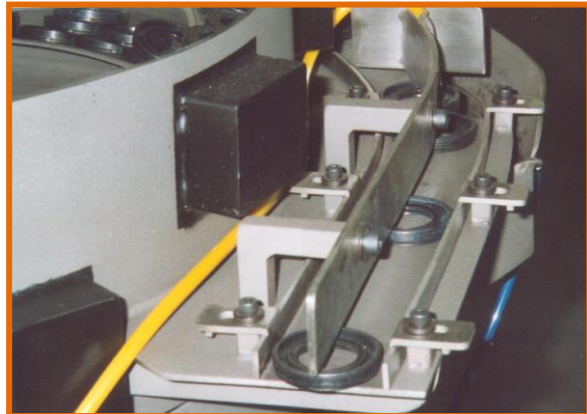

With over 35 years of experience in building and troubleshooting vibratory bowls and feeders

Vibratory Feeder Bowls are the most versatile feed system available in the AKS Enterprises product collection, able to handle both large and very small parts. Bowls occupy a minimal amount of space while orienting, selecting and sorting parts in a very cost effective manner.

Single lane feeding for better orientation of cylinder and spherical parts.

From the basic to the complicated; the owner oversees all aspects of work and service

# Used Vibratory Feeders

All rebuilds are refurbished and tooled for optimum performance.

Refurbished vibratory feeders are available in some capacity at our warehouse.

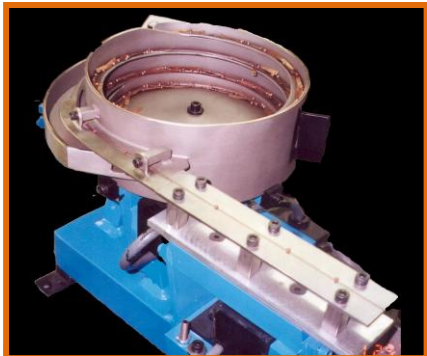

Examining your existing bowls with the help of a qualified AKS sales engineer will help determine if we can salvage portions of your existing system.

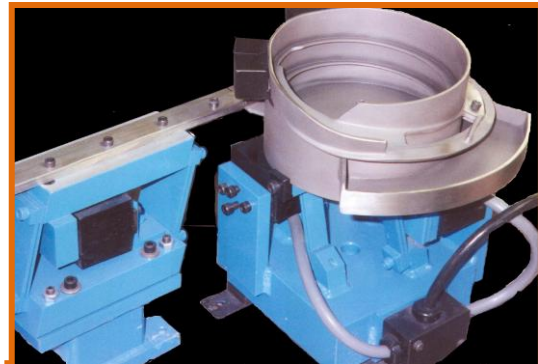

Reduced costs can be achieved with the cost saving methods mentioned.

## Inlines

Inline feeders convey oriented parts in a linear motion across tracks designed to transport a specific part shape or product. Inline feeders can be fastened directly to the machine base and requires no rubber feet for mounting. Reliable track alignment is obtained through the absence of rubber feet. An inline unit is available for each standard bowl diameter.

Custom discharge height and track length are available by

Several types of drives are available depending on the applications and the size of the feeder bowls.

# Sound Enclosures

From the conventional to the very unique, our engineers and builders can accommodate the most problematic sound or size constraints in-order to satisfy our customers' needs.

This custom sound enclosure below was made for an industrial application and is of **galvanized** construction. It was pre-assembled at our facility so it can easily be reassembled. The enclosure has cylinder shaped doors for easy access to equipment for maintenance. An air inlet allows for outside air into enclosure.

Custom enclosures designed to the customer's specifications.

The dual cylinder style door enclosure offers unobstructed loading and can be single or multiple chambered.

Sound enclosures are available in traditional box style.

# Bulk Hoppers

# Tables and Bases

Custom and conventional base building is one more service AKS enterprises offer their customers. Our Engineering staff will work to find the best fit for our customers needs. We can match an existing base style or a complete stand alone design. Our bases are ergonomically sound and can be built from tubing or sold plate construction.

## **AKS Enterprises**

Our phones are always open for quotes but with our online quote request process, many of our customers find it's convenient to fill out the form provided below. Within 24 hours after submission, you will receive a preliminary written quote. At AKS Enterprises, qualified help is available from the first contact to the finish of the project.

## **Contact us**

Contact us today and receive personalized customer care, high-quality products and customized solutions to your most intricate feeding problems. Feeding Concepts- moving your parts to where profits are assembled.
